Eurofragrance's new natural scents gain Ecocert approval

6 November, 2009

Eurofragrance has obtained Ecocert certification for several new additions to its Naturall brand. The company has extended its Bio catalogue, which previously comprised just two scents (Bio Men and Bio Women) with four new concepts. Bio Uni, a fragrance for both men and women, opens with bergamot orange, yellow mandarin, cardamom and *Cananga odorata*, and contains base notes of patchouli, vetiver and amiris while Bio Children is described as a sparkling combination of petitgrain, pink grapefruit, lemon ice cream, green and yellow mandarin juice, canela leaves, caramel and lavender flowers on a bed of patchouli and cedar resin.

Designed for use in bath products, Bio Shower features top notes of lemon, orange pulp, ginger and galbanum with a heart of *Litsea cubeba* and spearmint, and a patchouli base.

Also new is Bio Cream, which comprises red pepper, nutmeg, cardamom, clove and coriander notes at the top and lime juice, ginger and star aniseed flower at its heart. Enhanced by cedar and patchouli, the fragrance is said to be ideal for use as a cosmetic perfume.
